

AGS3 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP00295
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from the Internal region of human AGS3.
Mol wt	72136
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	IHC-p, ELISA
Concentration	1 mg/ml
Full name	AGS3 Antibody
Synonyms	GPSM1; AGS3; G-protein-signaling modulator 1; Activator of G-protein signaling 3

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

G-protein signaling modulators (GPSMs) play diverse functional roles through their interaction with G-protein subunits. GPSM1 encodes a receptor-independent activator of G protein signaling, which is one of several factors that influence the basal activity of G-protein signaling systems. The G-protein signaling modulator 1 contains seven tetratricopeptide repeats in its N-terminal half and four G-protein regulatory (GPR) motifs in its C-terminal half. Multiple alternatively spliced transcript variants encoding different isoforms have been found for GPSM1.

Recommended Dilution

IHC: 1: 100 - 1: 300

ELISA: 1: 5000

Not yet tested in other applications.
