

# Ron(Phospho Ser1394) Polyclonal Antibody

## Description

Product type Primary Antibody

Code BT-AP01527

Host Rabbit

Isotype IgG

**Size** 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from human CD136/RON around the

phosphorylation site of Ser1394. AA range:1351-1400

Mol wt 152227

Species reactivity Human, Mouse

Clonality Polyclonal

Recommended application WB, ELISA

Concentration 1 mg/ml

Full name Macrophage-stimulating protein receptor

Synonyms Macrophage-stimulating protein receptor; MST1R; PTK8; RON; Macrophage-stimulating protein receptor;

MSP receptor; CDw136; Protein-tyrosine kinase 8; p185-Ron; CD antigen CD136

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

### Background

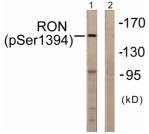

This gene encodes a cell surface receptor for macrophage-stimulating protein (MSP) with tyrosine kinase activity. The mature form of this protein is a heterodimer of disulfide-linked alpha and beta subunits| generated by proteolytic cleavage of a single-chain precursor. The beta subunit undergoes tyrosine phosphorylation upon stimulation by MSP. This protein is expressed on the ciliated epithelia of the mucociliary transport apparatus of the lung| and together with MSP| thought to be involved in host defense. Alternative splicing generates multiple transcript variants encoding different isoforms that may undergo similar proteolytic processing.

#### Recommended Dilution

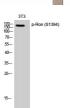

WB: 1: 500 - 1: 2000 ELISA: 1: 40000

Not yet tested in other applications.

#### **Images**

Western Blot analysis of 3T3 cells using Phospho-Ron (S1394) Polyclonal Antibody diluted at 1:500

Western blot analysis of lysates from HeLa cells treated with TNF-a 20ng/ml 2', using CD136/RON (Phospho-Ser1394) Antibody. The lane on the right is blocked with the phospho peptide.

# Storage

-20°C for 1 year
