

Claudin-6 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP01850
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from Claudin-6 . at AA range: 160-240
Mol wt	23292
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	IHC-p, ELISA
Concentration	1 mg/ml
Full name	Claudin-6 Antibody
Synonyms	CLDN6; Claudin-6; Skullin

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Tight junctions represent one mode of cell-to-cell adhesion in epithelial or endothelial cell sheets, forming continuous seals around cells and serving as a physical barrier to prevent solutes and water from passing freely through the paracellular space. These junctions are comprised of sets of continuous networking strands in the outwardly facing cytoplasmic leaflet, with complementary grooves in the inwardly facing extracytoplasmic leaflet. CLDN6 (claudin 6) encodes a component of tight junction strands, which is a member of the claudin family. The protein is an integral membrane protein and is one of the entry cofactors for hepatitis C virus. CLDN6 methylation may be involved in esophageal tumorigenesis. CLDN6 is adjacent to another family member CLDN9 on chromosome 16.

Recommended Dilution

IHC: 1: 100 - 1: 300

ELISA: 1: 5000

Not yet tested in other applications.
