

## ANR11 Rabbit Polyclonal Antibody

### Description

|                                |  |
|--------------------------------|--|
| <b>Product type</b>            | Primary Antibody                             |
| <b>Code</b>                    | BT-AP01862                                   |
| <b>Host</b>                    | Rabbit                                       |
| <b>Isotype</b>                 | IgG  |
| <b>Size</b>                    | 100ul, 50ul, 20ul                            |
| <b>Immunogen</b>               | Synthesized peptide derived from human ANR11 |
| <b>Mol wt</b>                  | 292930                                       |
| <b>Species reactivity</b>      | Human, Rat, Mouse                            |
| <b>Clonality</b>               | Polyclonal                                   |
| <b>Recommended application</b> | IHC-p, IF                                    |
| <b>Concentration</b>           | 1 mg/ml                                      |
| <b>Full name</b>               | ANR11  |
| <b>Synonyms</b>                | ANR11  |

**This product is for research use only, not for use in human, therapeutic or diagnostic procedure.**

### Background

This locus encodes an ankryin repeat domain-containing protein. The encoded protein inhibits ligand-dependent activation of transcription. Mutations in this gene have been associated with KBG syndrome| which is characterized by macrodontia| distinctive craniofacial features| short stature| skeletal anomalies| global developmental delay| seizures and intellectual disability. Alternatively spliced transcript variants have been described. Related pseudogenes exist on chromosomes 2 and X.

### Recommended Dilution

IHC-p: 1: 50 - 1: 200

Not yet tested in other applications.

### Images

No images.

### Storage

-20°C for 1 year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
