

## DC122 Rabbit Polyclonal Antibody

### Description

Product type	Primary Antibody
Code	BT-AP02152
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from human DC122
Mol wt	50930
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	DC122
Synonyms	DC122

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

### Background

This gene encodes a member of the WD repeat protein family. WD repeats are minimally conserved regions of approximately 40 amino acids typically bracketed by Gly-His and Trp-Asp (GH-WD) which may facilitate formation of heterotrimeric or multi-protein complexes. Members of this family are involved in a variety of cellular processes including cell cycle progression, signal transduction, apoptosis and gene regulation. This gene appears to represent an intronless retrocopy of a related multi-exon gene located on chromosome 9. However, the CDS of this intronless gene remains intact, it is conserved in other mammalian species, it is known to be transcribed, and it is therefore thought to encode a functional protein.

### Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.

### Images

Western blot analysis of lysates from SH-SY5Y cells, primary antibody was diluted at 1:1000, 4°C overnight

### Storage

-20°C for 1 year
