

CYP39A1 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP02417
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human Cytochrome P450 39A1. AA range:361-410
Mol wt	54116
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB, IHC-p, IF, ELISA
Concentration	1 mg/ml
Full name	CYP39A1 Antibody
Synonyms	CYP39A1; 24-hydroxycholesterol 7-alpha-hydroxylase; Cytochrome P450 39A1; hCYP39A1; Oxysterol 7-alpha-hydroxylase

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

CYP39A1 (cytochrome P450 family 39 subfamily A member 1) encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. This endoplasmic reticulum protein is involved in the conversion of cholesterol to bile acids. Its substrates include the oxysterols 25-hydroxycholesterol, 27-hydroxycholesterol and 24-hydroxycholesterol. Alternate splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000

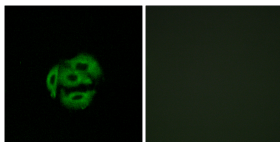

IHC: 1: 100 - 1: 300

IF: 1: 200 - 1: 1000

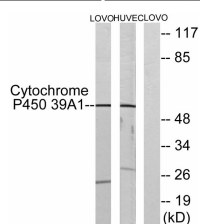

ELISA: 1: 10000

Not yet tested in other applications.

Images

Immunofluorescence analysis of A549 cells, using Cytochrome P450 39A1 Antibody. The picture on the right is blocked with the synthesized peptide.

Western blot analysis of lysates from LOVO and HUVEC cells, using Cytochrome P450 39A1 Antibody. The lane on the right is blocked with the synthesized peptide.

Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
