

Defensin Alpha3 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP02562
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human Defensin alpha3. AA range:3-52
Mol wt	10245
Species reactivity	Human
Clonality	Polyclonal
Recommended application	IHC-p, ELISA
Concentration	1 mg/ml
Full name	Defensin alpha3 Antibody
Synonyms	DEFA3; DEF3; Neutrophil defensin 3; Defensin; alpha 3; HNP-3; HP-3; HP3

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Defensins are a family of antimicrobial and cytotoxic peptides thought to be involved in host defense. They are abundant in the granules of neutrophils and also found in the epithelia of mucosal surfaces such as those of the intestine, respiratory tract, urinary tract, and vagina. Members of the defensin family are highly similar in protein sequence and distinguished by a conserved cysteine motif. Neutrophil defensin 3 encoded by DEFA3, defensin, alpha 3, is found in the microbicidal granules of neutrophils and likely plays a role in phagocyte-mediated host defense. Several alpha defensin genes are clustered on chromosome 8. DEFA3 differs from defensin, alpha 1 by only one amino acid. This gene and the gene encoding defensin, alpha 1 are both subject to copy number variation.

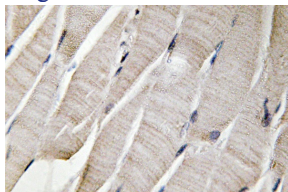

Recommended Dilution

IHC: 1: 100 - 1: 300

ELISA: 1: 20000

Not yet tested in other applications.
