

FBX22 Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP02646
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from human FBX22
Mol wt	44330
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	FBX22
Synonyms	FBX22

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif| the F-box. The F-box proteins constitute one of the four subunits of the ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box)| which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains| Fbls containing leucine-rich repeats| and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbxs class and| as a transcriptional target of the tumor protein p53| is thought to be involved in degradation of specific proteins in response to p53 induction. Alternative splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.

Images

Western blot analysis of lysates from HpeG2 cells, primary antibody was diluted at 1:1000, 4°C overnight

Storage

-20°C for 1 year
