

Emx2 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP02946
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human EMX2. AA range:91-140
Mol wt	28303
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	IHC-p, ELISA
Concentration	1 mg/ml
Full name	Emx2 Antibody
Synonyms	EMX2; Homeobox protein EMX2; Empty spiracles homolog 2; Empty spiracles-like protein 2

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

EMX2 encodes a homeobox-containing transcription factor that is the homolog to the empty spiracles gene in *Drosophila*. Research on EMX2 in humans has focused on its expression in three tissues: dorsal telencephalon, olfactory neuroepithelium, and urogenital system. It is expressed in the dorsal telencephalon during development in a low rostral-lateral to high caudal-medial gradient and is proposed to pattern the neocortex into defined functional areas. It is also expressed in embryonic and adult olfactory neuroepithelia where it complexes with eukaryotic translation initiation factor 4E (eIF4E) and possibly regulates mRNA transport or translation. In the developing urogenital system, it is expressed in epithelial tissues and is negatively regulated by HOXA10. Alternative splicing results in multiple transcript variants encoding distinct proteins.

Recommended Dilution

IHC: 1: 100 - 1: 300

ELISA: 1: 20000

Not yet tested in other applications.
