

HGFA Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP03957
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from the C-terminal region of human HGFA.
Mol wt	70682
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	HGFA Antibody
Synonyms	HGFAC; Hepatocyte growth factor activator; HGF activator; HGFA

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

HGFAC encodes a member of the peptidase S1 protein family. The hepatocyte growth factor activator is first synthesized as an inactive single-chain precursor before being activated to a heterodimeric form by endoproteolytic processing. It acts as serine protease that converts hepatocyte growth factor to the active form. Alternative splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 40000

Not yet tested in other applications.

Images

Western Blot analysis of extracts from K562, Jurkat cells, using HGFA Polyclonal Antibody. Secondary antibody was diluted at 1:20000

Storage

-20°C for one year
