

HSC 70 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP04223
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human HSPA8. AA range:230-279
Mol wt	70898
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	HSC 70 Antibody
Synonyms	HSPA8; HSC70; HSP73; HSPA10; Heat shock cognate 71 kDa protein; Heat shock 70 kDa protein 8

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

HSPA8 encodes a member of the heat shock protein 70 family, which contains both heat-inducible and constitutively expressed members. Heat shock cognate 71 kDa protein belongs to the latter group, which are also referred to as heat-shock cognate proteins. It functions as a chaperone, and binds to nascent polypeptides to facilitate correct folding. It also functions as an ATPase in the disassembly of clathrin-coated vesicles during transport of membrane components through the cell. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 10000

Not yet tested in other applications.
