

IL-17R Alpha Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP04455
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from human IL-17R α
Mol wt	86294
Species reactivity	Human
Clonality	Polyclonal
Recommended application	IHC-p, WB
Concentration	1 mg/ml
Full name	IL-17Ralpha Antibody
Synonyms	Interleukin-17 receptor A (IL-17 receptor A) (IL-17RA) (CDw217) (CD antigen CD217)

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

IL17RC encodes a single-pass type I membrane protein that shares similarity with the interleukin-17 receptor (IL-17RA). Unlike IL-17RA, which is predominantly expressed in hemopoietic cells, and binds with high affinity to only IL-17A, Interleukin-17 receptor C is expressed in nonhemopoietic tissues, and binds both IL-17A and IL-17F with similar affinities. The proinflammatory cytokines, IL-17A and IL-17F, have been implicated in the progression of inflammatory and autoimmune diseases. Multiple alternatively spliced transcript variants encoding different isoforms have been detected for this gene, and it has been proposed that soluble, secreted proteins lacking transmembrane and intracellular domains may function as extracellular antagonists to cytokine signaling.

Recommended Dilution

WB: 1: 500 - 2000

IHC-p: 1: 50 - 200

Not yet tested in other applications.
