

Integrin Beta4 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP04590
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from the Internal region of human ITGB4. AA range:641-690
Mol wt	202151
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Integrin beta4 Antibody
Synonyms	ITGB4; Integrin beta-4; GP150; CD104

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Integrins are heterodimers comprised of alpha and beta subunits, that are noncovalently associated transmembrane glycoprotein receptors. Different combinations of alpha and beta polypeptides form complexes that vary in their ligand-binding specificities. Integrins mediate cell-matrix or cell-cell adhesion, and transduced signals that regulate gene expression and cell growth. ITGB4 encodes Integrin beta-4, a receptor for the laminins. This subunit tends to associate with alpha 6 subunit and is likely to play a pivotal role in the biology of invasive carcinoma. Mutations in this gene are associated with epidermolysis bullosa with pyloric atresia. Multiple alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 20000

Not yet tested in other applications.

Images

Western Blot analysis of PC12 cells using Integrin β 4 Polyclonal Antibody. Secondary antibody was diluted at 1:20000

Storage

-20°C for one year
