

Jun B Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP04714

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from human JunB. AA range:46-95

Mol wt 35879

Species reactivity Human, Mouse, Rat

Clonality Polyclonal

Recommended application WB, IHC-p, IP, ELISA

Concentration 1 mg/ml

Full name Jun B Antibody

Synonyms JUNB; Transcription factor jun-B

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

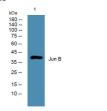

JunB is a basic region, leucine zipper (bZIP) transcription factor belonging to the Jun family that includes c-Jun and JunD. Jun family members homodimerize or heterodimerize with Fos and ATF proteins to form a functional transcription factor AP-1 (activator protein 1), whose activity is regulated by a variety of physiological and pathological stimuli such as growth factors, infections, and stress signals. While JunB sometimes antagonizes c-Jun transcriptional activity, it may functionally substitute for c-Jun during development in mice. JunB regulates hematopoietic stem cell number and plays an important role in the pathogenesis of chronic myelogenous leukemia (CML) and acute myeloid leukemia (AML).

Recommended Dilution

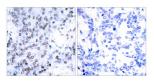

WB: 1: 500 - 1: 2000 IHC: 1: 100 - 1: 300 ELISA: 1: 10000 IP: 2 - 5 ug: mg lysate

Not yet tested in other applications.

Images

Western blot analysis of lysates from K562 cells, primary antibody was diluted at $1:1000, 4^{\circ}$ over night

Immunohistochemistry analysis of paraffin-embedded human breast carcinoma tissue, using JunB Antibody. The picture on the right is blocked with the synthesized peptide.

-20°C for one year
