

KOR-1 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP04856
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from mouse KOR-1. AA range:331-380
Mol wt	42645
Species reactivity	Mouse, Rat
Clonality	Polyclonal
Recommended application	IHC-p, WB, ELISA
Concentration	1 mg/ml
Full name	KOR-1 Antibody
Synonyms	OPRK1; OPRK; Kappa-type opioid receptor; K-OR-1; KOR-1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

OPRK1 encodes an opioid receptor, which is a member of the 7 transmembrane-spanning G protein-coupled receptor family. It functions as a receptor for endogenous ligands, as well as a receptor for various synthetic opioids. Ligand binding results in inhibition of adenylate cyclase activity and neurotransmitter release. This opioid receptor plays a role in the perception of pain and mediating the hypolocomotor, analgesic and aversive actions of synthetic opioids. Variations in OPRK1 have also been associated with alcohol dependence and opiate addiction. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. A recent study provided evidence for translational readthrough in this gene and expression of an additional C-terminally extended isoform via the use of an alternative in-frame translation termination codon.

Recommended Dilution

WB: 1: 500 - 2000

ELISA: 1: 5000

IHC: 1: 100 - 1: 300

Not yet tested in other applications.

Images

Immunohistochemistry analysis of paraffin-embedded human brain tissue, using KOR-1 Antibody. The picture on the right is blocked with the synthesized peptide.

Western blot analysis of lysates from U2OS cells, primary antibody was diluted at 1:1000, 4° over night

Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
