

MMP-9 Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP05489

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from the Internal region of human MMP9.

AA range:411-460

Mol wt 78427

Species reactivity Human

Clonality Polyclonal

Recommended application IF, WB, IHC-p, ELISA

Concentration 1 mg/ml

Full name MMP-9 Antibody

Synonyms MMP9; CLG4B; Matrix metalloproteinase-9; MMP-9; 92 kDa gelatinase; 92 kDa type IV collagenase;

Gelatinase B; GELB

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling.

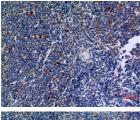

Recommended Dilution

WB: 1: 500 - 1: 2000 IHC-p: 1: 100 - 1: 300 ELISA: 1: 20000

IF: 1: 50 - 200

Not yet tested in other applications.

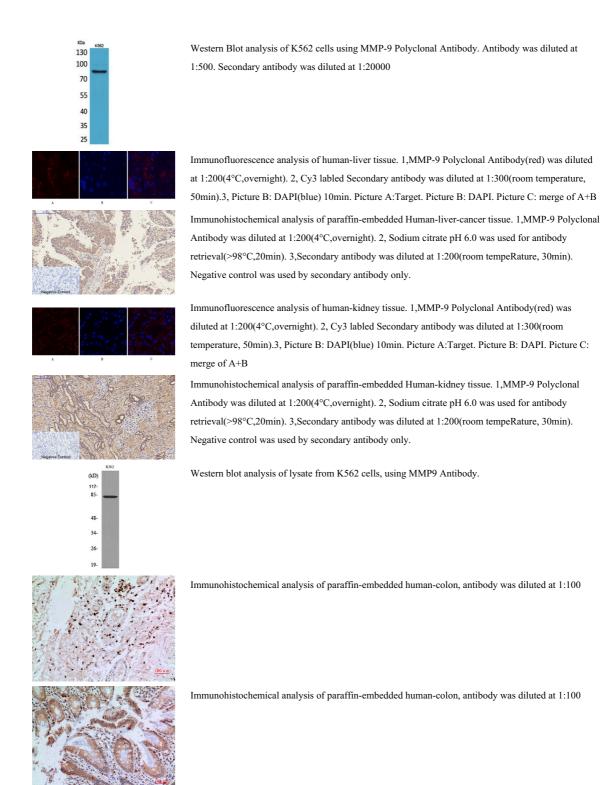

Images
