

MRP-L35 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP05585
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from MRP-L35 . at AA range: 80-160
Mol wt	21514
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	MRP-L35 Antibody
Synonyms	MRPL35; BM-007; 39S ribosomal protein L35, mitochondrial; L35mt; MRP-L35

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes(mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. MRPL35(mitochondrial ribosomal protein L35) encodes a 39S subunit protein. Sequence analysis identified three transcript variants. Pseudogenes corresponding to MRPL35 are found on chromosomes 6p, 10q, and Xp.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 10000

Not yet tested in other applications.

Images

Western blot analysis of 293 using MRP-L35 antibody. Antibody was diluted at 1:2000. Secondary antibody was diluted at 1:20000

Western blot analysis of 293T COLO using MRP-L35 antibody. Antibody was diluted at 1:2000. Secondary antibody was diluted at 1:20000

Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
