

Ob-R Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP06325
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human Leptin Receptor. AA range:1107-1156
Mol wt	132494
Species reactivity	Human, Mouse, Monkey
Clonality	Polyclonal
Recommended application	WB, IHC-p, ELISA
Concentration	1 mg/ml
Full name	Ob-R Antibody
Synonyms	LEPR; DB; OBR; Leptin receptor; LEP-R; HuB219; OB receptor; OB-R; CD antigen CD295

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by LEPR belongs to the gp130 family of cytokine receptors that are known to stimulate gene transcription via activation of cytosolic STAT proteins. This protein is a receptor for leptin (an adipocyte-specific hormone that regulates body weight), and is involved in the regulation of fat metabolism, as well as in a novel hematopoietic pathway that is required for normal lymphopoiesis. Mutations in this gene have been associated with obesity and pituitary dysfunction. Alternatively spliced transcript variants encoding different isoforms have been described for this gene. It is noteworthy that this gene and LEPROT gene (GeneID: 54741) share the same promoter and the first 2 exons, however, encode distinct proteins (PMID: 9207021).

Recommended Dilution

WB: 1: 500 - 1: 2000

IHC: 1: 100 - 1: 300

ELISA: 1: 20000

Not yet tested in other applications.

Images

Western Blot analysis of COS7 cells using Ob-R Polyclonal Antibody

Western blot analysis of lysates from COS7 cells, treated with calyculinA 50ng/ml 30', using Leptin Receptor Antibody. The lane on the right is blocked with the synthesized peptide.

Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
