

c-Abl(Phospho-Tyr89) Rabbit Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP06659

Host Rabbit

Isotype IgG

Size 100ul, 50ul, 20ul

Immunogen Synthesized phosho peptide around human c-Abl (Tyr89)

Mol wt N/A

Species reactivity Human, Rat, Mouse

Clonality Polyclonal

Recommended application WB

Concentration 1 mg/ml

Full name c-Abl

Synonyms c-Abl ;Tyr89 ; Tyrosine-protein kinase ABL1; EC 2.7.10.2; Abelson murine leukemia viral oncogene

homolog 1; Abelson tyrosine-protein kinase 1; Proto-oncogene c-Abl; p150

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene is a protooncogene that encodes a protein tyrosine kinase involved in a variety of cellular processes| including cell division| adhesion| differentiation| and response to stress. The activity of the protein is negatively regulated by its SH3 domain| whereby deletion of the region encoding this domain results in an oncogene. The ubiquitously expressed protein has DNA-binding activity that is regulated by CDC2-mediated phosphorylation| suggesting a cell cycle function. This gene has been found fused to a variety of translocation partner genes in various leukemias| most notably the t(9;22) translocation that results in a fusion with the 5' end of the breakpoint cluster region gene (BCR; MIM:151410). Alternative splicing of this gene results in two transcript variants| which contain alternative first exons that are spliced to the remaining common exons.

Recommended Dilution

WB: 1: 1000 - 1: 2000

Not yet tested in other applications.
