

PP32R1 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP07352
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human ANP32C. AA range:121-170
Mol wt	26762
Species reactivity	Human
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	PP32R1 Antibody
Synonyms	ANP32C; PP32R1; Acidic leucine-rich nuclear phosphoprotein 32 family member C; Phosphoprotein 32-related protein 1; Tumorigenic protein pp32r1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Phosphoprotein 32 (PP32) is a tumor suppressor that can inhibit several types of cancers, including prostate and breast cancers. Acidic nuclear phosphoprotein 32 family member C encoded by ANP32C is one of at least two proteins that are similar in amino acid sequence to PP32 and are part of the same acidic nuclear phosphoprotein gene family. However, unlike PP32, the encoded protein is tumorigenic. The tumor suppressor function of PP32 has been localized to a 25 amino acid region that is divergent between PP32 and acidic nuclear phosphoprotein 32 family member C encoded by ANP32C. ANP32C does not contain introns.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 10000

Not yet tested in other applications.
