

CD11A Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP07363
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from human CD11A
Mol wt	86130
Species reactivity	Human, Rat, Mouse
Clonality	Polyclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	CD11A
Synonyms	CD11A; Itgal; Integrin Alpha L; ITGAL protein; LFA1A; Ly21; Ly15; P180

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

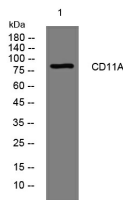

This gene encodes a member of the serine/threonine protein kinase family. Members of this kinase family are known to be essential for eukaryotic cell cycle control. Due to a segmental duplication, this gene shares very high sequence identity with a neighboring gene. These two genes are frequently deleted or altered in neuroblastoma. The protein kinase encoded by this gene can be cleaved by caspases and may play a role in cell apoptosis. Alternative splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.
