

CENPF Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP07598
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human protein . at AA range: 2190-2270
Mol wt	N/A
Species reactivity	Human, Rat, Mouse
Clonality	Polyclonal
Recommended application	IHC-p, IF
Concentration	1 mg/ml
Full name	Centromere protein F
Synonyms	Centromere protein F ;CENP-F;AH antigen;Kinetochore protein CENPF;Mitosisin

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes a protein that associates with the centromere-kinetochore complex. The protein is a component of the nuclear matrix during the G2 phase of interphase. In late G2 the protein associates with the kinetochore and maintains this association through early anaphase. It localizes to the spindle midzone and the intracellular bridge in late anaphase and telophase, respectively, and is thought to be subsequently degraded. The localization of this protein suggests that it may play a role in chromosome segregation during mitosis. It is thought to form either a homodimer or heterodimer. Autoantibodies against this protein have been found in patients with cancer or graft versus host disease.

Recommended Dilution

IHC-p: 1: 50 - 1: 300

Not yet tested in other applications.
