

## Raf-B Polyclonal Antibody

### Description

|                                |  |
|--------------------------------|--|
| <b>Product type</b>            | Primary Antibody   |
| <b>Code</b>                    | BT-AP07631   |
| <b>Host</b>                    | Rabbit   |
| <b>Isotype</b>                 | IgG  |
| <b>Size</b>                    | 20ul, 50ul, 100ul  |
| <b>Immunogen</b>               | The antiserum was produced against synthesized peptide derived from human B-RAF. AA range:171-220                                    |
| <b>Mol wt</b>                  | 84437  |
| <b>Species reactivity</b>      | Human, Mouse   |
| <b>Clonality</b>               | Polyclonal   |
| <b>Recommended application</b> | WB, IHC-p, IF, ELISA   |
| <b>Concentration</b>           | 1 mg/ml  |
| <b>Full name</b>               | Raf-B Antibody   |
| <b>Synonyms</b>                | BRAF; BRAF1; RAFB1; Serine/threonine-protein kinase B-raf; Proto-oncogene B-Raf; p94; v-Raf murine sarcoma viral oncogene homolog B1 |

**This product is for research use only, not for use in human, therapeutic or diagnostic procedure.**

### Background

BRAF (B-Raf proto-oncogene, serine/threonine kinase) encodes a protein belonging to the raf/mil family of serine/threonine protein kinases. This protein plays a role in regulating the MAP kinase/ERKs signaling pathway, which affects cell division, differentiation, and secretion. Mutations in BRAF are associated with cardiofaciocutaneous syndrome, a disease characterized by heart defects, mental retardation and a distinctive facial appearance. Mutations in BRAF have also been associated with various cancers, including non-Hodgkin lymphoma, colorectal cancer, malignant melanoma, thyroid carcinoma, non-small cell lung carcinoma, and adenocarcinoma of lung. A pseudogene, which is located on chromosome X, has been identified for BRAF.

### Recommended Dilution

WB: 1: 500 - 1: 2000

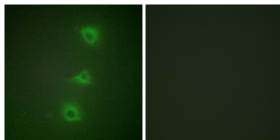

IHC: 1: 100 - 1: 300

IF: 1: 200 - 1: 1000

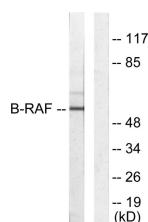

ELISA: 1: 20000

Not yet tested in other applications.

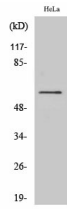

### Images

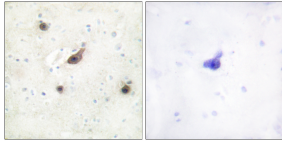

Immunofluorescence analysis of HUVEC cells, using B-RAF Antibody. The picture on the right is blocked with the synthesized peptide.

Western blot analysis of lysates from HeLa cells, using B-RAF Antibody. The lane on the right is blocked with the synthesized peptide.

Western Blot analysis of various cells using Raf-B Polyclonal Antibody diluted at 1:1000

Immunohistochemistry analysis of paraffin-embedded human brain tissue, using B-RAF Antibody.  
The picture on the right is blocked with the synthesized peptide.

### Storage

-20°C for one year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
