## Ribosomal Protein S5 Polyclonal Antibody

Description

| Product type | Primary Antibody |
| :--- | :--- |
| Code | BT-AP07890 |
| Host | Rabbit |
| Isotype | IgG |
| Size | 20ul, 50ul, 100ul |
| Immunogen | Synthesized peptide derived from Ribosomal Protein S5 . at AA range: 60-140 |
| Mol wt | 22876 |
| Species reactivity | Human, Mouse, Rat |
| Clonality | Polyclonal |
| Recommended application | WB, ELISA |
| Concentration | $1 \mathrm{mg} / \mathrm{ml}$ |
| Full name | Ribosomal Protein S5 Antibody |
| Synonyms | RPS5; 40S ribosomal protein S5 |

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

## Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40 S subunit and a large 60 S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. RPS5 (ribosomal protein S5) encodes a ribosomal protein that is a component of the 40 S subunit. The protein belongs to the S7P family of ribosomal proteins. It is located in the cytoplasm. Variable expression of RPS5 in colorectal cancers compared to adjacent normal tissues has been observed, although no correlation between the level of expression and the severity of the disease has been found. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of RPS5 dispersed through the genome.

## Recommended Dilution

WB: 1: 500-1: 2000
ELISA: 1: 5000
Not yet tested in other applications.
