

RNF113B Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP07951
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized peptide derived from the Internal region of human RNF113B.
Mol wt	36259
Species reactivity	Human
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	RNF113B Antibody
Synonyms	RNF113B; RNF161; ZNF183L1; RING finger protein 113B; Zinc finger protein 183-like 1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by this gene contains a RING zinc finger, a motif known to be involved in protein-protein interactions. The specific function of this gene has not yet been determined. Alternatively spliced transcript variants that encode the same protein have been reported. A pseudogene, which is also located on chromosome 3, has been defined for this gene. RNF13 (Ring Finger Protein 13) is a Protein Coding gene. Gene Ontology (GO) annotations related to this gene include ligase activity and ubiquitin-protein transferase activity. An important paralog of this gene is RNF167. E3 ubiquitin-protein ligase that may play a role in controlling cell proliferation.

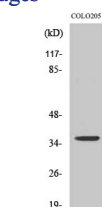

Recommended Dilution

WB: 1: 500 - 1: 2000

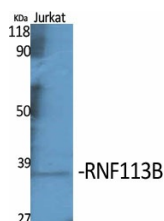

ELISA: 1: 10000

Not yet tested in other applications.
