

SRF Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP08558
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human SRF. AA range:126-175
Mol wt	51593
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB, IHC-p, ELISA
Concentration	1 mg/ml
Full name	SRF Antibody
Synonyms	SRF; Serum response factor; SRF

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

SRF (serum response factor) encodes a ubiquitous nuclear protein that stimulates both cell proliferation and differentiation. It is a member of the MADS (MCM1, Agamous, Deficiens, and SRF) box superfamily of transcription factors. This protein binds to the serum response element (SRE) in the promoter region of target genes. This protein regulates the activity of many immediate-early genes, for example c-fos, and thereby participates in cell cycle regulation, apoptosis, cell growth, and cell differentiation. SRF is the downstream target of many pathways; for example, the mitogen-activated protein kinase pathway (MAPK) that acts through the ternary complex factors (TCFs). Two transcript variants encoding different isoforms have been found for SRF.

Recommended Dilution

WB: 1: 500 - 1: 2000

IHC: 1: 100 - 1: 300

ELISA: 1: 20000

Not yet tested in other applications.

Images

Western blot analysis of lysates from HeLa cells, using SRF Antibody. The lane on the right is blocked with the synthesized peptide.

Storage

-20°C for one year
