

# **CYTSA Rabbit Polyclonal Antibody**

## Description

Product type Primary Antibody

Code BT-AP08856

**Host** Rabbit

Isotype IgG

**Size** 20ul, 50ul, 100ul

Immunogen Synthesized peptide derived from human CYTSA

Mol wt 122870

Species reactivity Human, Mouse, Rat

**Clonality** Polyclonal

Recommended application WB

Concentration 1 mg/ml

Full name CYTSA

Synonyms CYTSA

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

# Background

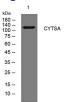

This gene encodes a coiled-coil domain containing protein. The encoded protein may play a critical role in actin-cytoskeletal reorganization during facial morphogenesis. Mutations in this gene are a cause of oblique facial clefting-1. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. A read-through transcript composed of SPECC1L (sperm antigen with calponin homology and coiled-coil domains 1-like) and the downstream ADORA2A (adenosine A2a receptor) gene sequence has been identified but it is thought to be non-coding.

# Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.

#### Images

Western blot analysis of lysates from HpeG2 cells, primary antibody was diluted at 1:1000, 4°C overnight

## Storage

-20°C for 1 year
