

D106A Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP08870
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human D106A
Mol wt	7150
Species reactivity	Human, Rat, Mouse
Clonality	Polyclonal
Recommended application	IHC-p, IF
Concentration	1 mg/ml
Full name	D106A
Synonyms	D106A

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Defensins form a family of antimicrobial and cytotoxic peptides made by neutrophils. Defensins are short| processed peptide molecules that are classified by structure into three groups: alpha-defensins| beta-defensins and theta-defensins. All beta-defensin genes are densely clustered in four to five syntenic chromosomal regions. Chromosome 8p23 contains at least two copies of the duplicated beta-defensin cluster. This duplication results in two identical copies of defensin| beta 106| DEFB106A and DEFB106B| in head-to-head orientation. This gene| DEFB106A| represents the more centromeric copy.

Recommended Dilution

IHC-p: 1: 50 - 1: 200

Not yet tested in other applications.
