Background

This gene encodes a member of the serine/threonine protein kinase family. The encoded protein| a component of a cytokine-activated protein complex that is an inhibitor of the essential transcription factor NF-kappa-B complex| phosphorylates sites that trigger the degradation of the inhibitor via the ubiquitination pathway| thereby activating the transcription factor.

IHC-p: 1: 100 - 1: 300

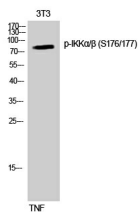

ELISA: 1: 10000
