

UBF Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP09368

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen Synthesized peptide derived from UBF . at AA range: 420-500

Mol wt 89406

Species reactivity Human, Mouse, Rat

Clonality Polyclonal

Recommended application WB, ELISA

Concentration 1 mg/ml

Full name UBF Antibody

Synonyms UBTF; UBF; UBF1; Nucleolar transcription factor 1; Autoantigen NOR-90; Upstream-binding factor 1;

UBF-1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

UBTF (upstream binding transcription factor, RNA polymerase I) encodes a member of the HMG-box DNA-binding protein family. The encoded protein plays a critical role in ribosomal RNA transcription as a key component of the pre-initiation complex, mediating the recruitment of RNA polymerase I to rDNA promoter regions. The encoded protein may also play important roles in chromatin remodeling and pre-rRNA processing, and its activity is regulated by both phosphorylation and acetylation. Alternatively spliced transcript variants encoding multiple isoforms have been observed for UBTF. Pseudogenes of UBTF are located on the short arm of chromosomes 3, 11 and X and the long arm of chromosome 11.

Recommended Dilution

WB: 1: 500 - 1: 2000 ELISA: 1: 40000

Not yet tested in other applications.
