

EGF Receptor(Phospho-Tyr1086) Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP09493
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized phosho peptide around human EGF Receptor (Tyr1086)
Mol wt	N/A
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	EGF Receptor
Synonyms	EGF Receptor ;Tyr1086; Epidermal growth factor receptor; EC 2.7.10.1; Proto-oncogene c-ErbB-1; Receptor tyrosine-protein kinase erbB-1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer.

Recommended Dilution

WB: 1: 1000 - 1: 2000

Not yet tested in other applications.
