

# Histone H2A.X Polyclonal Antibody

#### Description

Product type Primary Antibody

Code BT-AP09934

**Host** Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen Synthetic Peptide of Histone H2A.X

Mol wt N/A

Species reactivity Mouse, Rat

Clonality Polyclonal

Recommended application WB, IHC-p, IF

Concentration

Full name Histone H2AX

Synonyms Histone H2AX; H2AFX; H2AX; Histone H2A.x; H2a/x

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

#### Background

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene encodes a replication-independent histone that is a member of the histone H2A family, and generates two transcripts through the use of the conserved stem-loop termination motif, and the polyA addition motif.

## Recommended Dilution

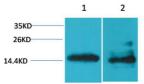

WB: 1: 1000 - 1: 2000 IHC: 1: 200 - 500

Not yet tested in other applications.

### Images

Immunohistochemical analysis of paraffin-embedded Mouse Colon Tissue using Histone H2A.X Polyclonal Antibody.

Western blot analysis of 1) 3T3, 2) Rat Brain Tissue using Histone H2A.X Polyclonal Antibody. Secondary antibody was diluted at 1:20000

## Storage

-20°C for 1 year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China Tel: 86 21 31007137 | E-mail: save@bt-laboratory.com | www.bt-laboratory.com
