

GALE Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP10117
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human GALE
Mol wt	38280
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB
Concentration	1 mg/ml
Full name	GALE
Synonyms	GALE

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes UDP-galactose-4-epimerase which catalyzes two distinct but analogous reactions: the epimerization of UDP-glucose to UDP-galactose| and the epimerization of UDP-N-acetylglucosamine to UDP-N-acetylgalactosamine. The bifunctional nature of the enzyme has the important metabolic consequence that mutant cells (or individuals) are dependent not only on exogenous galactose| but also on exogenous N-acetylgalactosamine as a necessary precursor for the synthesis of glycoproteins and glycolipids. Mutations in this gene result in epimerase-deficiency galactosemia| also referred to as galactosemia type 3| a disease characterized by liver damage| early-onset cataracts| deafness and mental retardation| with symptoms ranging from mild ('peripheral' form) to severe ('generalized' form). Multiple alternatively spliced transcripts encoding the same protein have been identified.

Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.

Images

Western blot analysis of lysates from PC-12 cells, primary antibody was diluted at 1:1000, 4°C overnight

Storage

-20°C for 1 year
