

# GDF11 Rabbit Polyclonal Antibody

## Description

| Product type            | Primary Antibody                             |
|-------------------------|--|
| Code                    | BT-AP10139                                   |
| Host                    | Rabbit                                       |
| Isotype                 | IgG  |
| Size                    | 100ul, 50ul, 20ul                            |
| Immunogen               | Synthesized peptide derived from human GDF11 |
| Mol wt                  | 44770  |
| Species reactivity      | Human, Mouse, Rat                            |
| Clonality               | Polyclonal                                   |
| Recommended application | WB   |
| Concentration           | 1 mg/ml                                      |
| Full name               | GDF11  |
| Synonyms                | GDF11  |

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

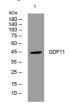

## Background

This gene encodes a secreted ligand of the TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of this family bind various TGF-beta receptors leading to recruitment and activation of SMAD family transcription factors that regulate gene expression. The encoded preproprotein is proteolytically processed to generate each subunit of the disulfide-linked homodimer. This protein plays a role in the development of the nervous and other organ systems| and may regulate aging.

#### **Recommended Dilution**

WB: 1: 500 - 1: 2000 Not yet tested in other applications.

#### Images

Western blot analysis of lysates from A549 cells, primary antibody was diluted at 1:1000, 4°C overnight

## Storage -20°C for 1 year
