

MOK(Phospho-Tyr161) Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP11432

Host Rabbit

Isotype IgG

Size 100ul, 50ul, 20ul

Immunogen Synthesized peptide derived from human MOK (Phospho-Tyr161)

Mol wt N/A

Species reactivity Human, Mouse, Rat

Clonality Polyclonal

Recommended application IHC-p, IF, WB

Concentration 1 mg/ml
Full name MOK

Synonyms MOK ;Phospho-Tyr161; MAPK/MAK/MRK overlapping kinase; EC 2.7.11.22; MOK protein kinase; Renal

tumor antigen 1; RAGE-1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene belongs to the MAP kinase superfamily. The gene was found to be regulated by caudal type transcription factor 2 (Cdx2) protein. The encoded protein, which is localized to epithelial cells in the intestinal crypt, may play a role in growth arrest and differentiation of cells of upper crypt and lower villus regions. Multiple alternatively spliced transcript variants encoding different isoforms have been observed for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000 IHC-p: 1: 50 - 1: 200

Not yet tested in other applications.
