

Proteasome alpha3 Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP12198
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human Proteasome $\alpha 3$
Mol wt	28050
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Proteasome alpha 3
Synonyms	Proteasome α 3; Proteasome subunit alpha type-3; EC 3.4.25.1; Macropain subunit C8; Multicatalytic endopeptidase complex subunit C8; Proteasome component C8

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The proteasome is a multicatalytic proteinase complex with a highly ordered ring-shaped 20S core structure. The core structure is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome| the immunoproteasome| is the processing of class I MHC peptides. This gene encodes a member of the peptidase T1A family| that is a 20S core alpha subunit. Two alternative transcripts encoding different isoforms have been identified.

Recommended Dilution

WB: 1: 1000 - 1: 2000 ELISA: 1: 5000 - 1: 20000 Not yet tested in other applications.

Images No images.

Storage -20°C for 1 year
