## OR4X2 Polyclonal Antibody

Description

| Product type | Primary Antibody |
| :--- | :--- |
| Code | BT-AP12494 |
| Host | Rabbit |
| Isotype | IgG |
| Size | $20 \mathrm{ul}, 50 \mathrm{ul}, 100 \mathrm{ul}$ |
| Immunogen | Synthesized peptide derived from human protein . at AA range: 220-300 |
| Mol wt | N/A |
| Species reactivity | Human, Rat, Mouse |
| Clonality | Polyclonal |
| Recommended application | 1 mg/ml |
| Concentration | Olfactory receptor 4X2 |
| Full name | Olfactory receptor 4X2 ;Olfactory receptor OR11-105 |
| Synonyms |  |

## Background

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. This olfactory receptor gene is a segregating pseudogene, where some individuals have an allele that encodes a functional olfactory receptor, while other individuals have an allele encoding a

## Recommended Dilution

WB: 1: 500-1: 2000
ELISA: 1: 5000-1: 20000
Not yet tested in other applications
