

PAX7 Polyclonal Antibody

Description

Primary Antibody
BT-AP12810
Rabbit
lgG
100ul, 50ul, 20ul
Synthesized peptide derived from part region of human protein
N/A
Human, Mouse
Polyclonal
WB, ELISA
1 mg/ml
Paired box protein Pax-7
Paired box protein Pax-7 ;HuP1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene is a member of the paired box (PAX) family of transcription factors. Members of this gene family typically contain a paired box domain, an octapeptide, and a paired-type homeodomain. These genes play critical roles during fetal development and cancer growth. The specific function of the paired box 7 gene is unknown but speculated to involve tumor suppression since fusion of this gene with a forkhead domain family member has been associated with alveolar rhabdomyosarcoma. Three transcript variants encoding different isoforms have been found for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000 ELISA: 1: 5000 - 1: 20000 Not yet tested in other applications.
