## PEPC(Phospho Ser15) Polyclonal Antibody

Description

| Product type | Primary Antibody |
| :--- | :--- |
| Code | BT-AP12930 |
| Host | Rabbit |
| Isotype | IgG |
| Size | $20 \mathrm{ul}, 50 \mathrm{ul}, 100 \mathrm{ul}$ |
| Immunogen | Synthetic Peptide of PEPC (Phospho Ser15) |
| Mol wt | 42426 |
| Species reactivity | Plants |
| Clonality | Polyclonal |
| Recommended application | WB |

## Concentration

| Full name | Gastricsin |
| :--- | :--- |
| Synonyms | Gastricsin; PGC; Gastricsin; Pepsinogen C |

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

## Background

This gene encodes an aspartic proteinase that belongs to the peptidase family A 1 . The encoded protein is a digestive enzyme that is produced in the stomach and constitutes a major component of the gastric mucosa. This protein is also secreted into the serum. This protein is synthesized as an inactive zymogen that includes a highly basic prosegment. This enzyme is converted into its active mature form at low pH by sequential cleavage of the prosegment that is carried out by the enzyme itself. Polymorphisms in this gene are associated with susceptibility to gastric cancers. Serum levels of this enzyme are used as a biomarker for certain gastric diseases including Helicobacter pylori related gastritis. Alternate splicing results in multiple transcript variants. A pseudogene of this gene is found on chromosome 1.

## Recommended Dilution

WB: 1: 1000-1: 2000
Not yet tested in other applications
