### Synonyms

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

### Background

Red Fluorescent Protein (RFP) is isolated from sea anemone (*Discosoma* sp), and commonly used as a molecular tag to study protein localization, reporter gene expression, and protein-protein interactions. Although it exists as a homotetramer, monomeric variants have been constructed for use in various applications.

### Recommended Dilution

WB: 1: 5000

Not yet tested in other applications.
