Background

This gene encodes a protein with several transmembrane domains| a Rab11-binding domain and a lipid-binding FYVE finger domain. The encoded protein appears to promote neurite formation. A mutation in this gene has been reported to be associated with hereditary spastic paraplegia| however the pathogenicity of the mutation| which may simply represent a polymorphism| is unclear.

Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.
