

RGPD5 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP13706
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human protein . at AA range: 1560-1640
Mol wt	N/A
Species reactivity	Human, Rat, Mouse
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	RANBP2-like and GRIP domain-containing protein 5/6
Synonyms	RANBP2-like and GRIP domain-containing protein 5/6 ;Ran-binding protein 2-like 1/2;RanBP2-like 1/2;RanBP2L1;RanBP2L2;Sperm membrane protein BS-63

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

RAN is a small GTP-binding protein of the RAS superfamily that is associated with the nuclear membrane and is thought to control a variety of cellular functions through its interactions with other proteins. This gene shares a high degree of sequence identity with RANBP2, a large RAN-binding protein localized at the cytoplasmic side of the nuclear pore complex. It is believed that this RANBP2 gene family member arose from a duplication event 3 Mb distal to RANBP2. Alternative splicing has been observed for this locus and two variants are described. Additional splicing is suggested but complete sequence for further transcripts has not been determined.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 5000 - 1: 20000

Not yet tested in other applications.
