

## ZNF16 Rabbit Polyclonal Antibody

### Description

|                         |  |
|-------------------------|--|
| Product type            | Primary Antibody                             |
| Code                    | BT-AP13850                                   |
| Host                    | Rabbit                                       |
| Isotype                 | IgG  |
| Size                    | 20ul, 50ul, 100ul                            |
| Immunogen               | Synthesized peptide derived from human ZNF16 |
| Mol wt                  | 75020  |
| Species reactivity      | Human, Rat, Mouse                            |
| Clonality               | Polyclonal                                   |
| Recommended application | WB   |
| Concentration           | 1 mg/ml                                      |
| Full name               | ZNF16  |
| Synonyms                | ZNF16  |

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

### Background

The protein encoded by this gene contains multiple tandem zinc finger motifs. The encoded protein is involved in the differentiation of erythroid and megakaryocytic cells. This gene is located in a cluster of related genes on chromosome 8 encoding zinc finger proteins. Alternative splicing results in multiple transcript variants.

### Recommended Dilution

WB: 1: 500 - 1: 2000

Not yet tested in other applications.

### Images

Western blot analysis of lysates from HpeG2 cells, primary antibody was diluted at 1:1000, 4°C overnight

### Storage

-20°C for 1 year

501 Changsheng S Rd, Nanhu Dist, Jiaxing, Zhejiang, China
