

SEPT4 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP14124
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from part region of human protein
Mol wt	N/A
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Septin-4
Synonyms	Septin-4 ;Apoptosis-related protein in the TGF-beta signaling pathway;ARTS;Bradeion beta;Brain protein H5;CE5B3 beta;Cell division control-related protein 2;hCDCREL-2;Cerebral protein 7

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene is a member of the septin family of nucleotide binding proteins, originally described in yeast as cell division cycle regulatory proteins. Septins are highly conserved in yeast, Drosophila, and mouse, and appear to regulate cytoskeletal organization. Disruption of septin function disturbs cytokinesis and results in large multinucleate or polyploid cells. This gene is highly expressed in brain and heart. Alternatively spliced transcript variants encoding different isoforms have been described for this gene. One of the isoforms (known as ARTS) is distinct; it is localized to the mitochondria, and has a role in apoptosis and cancer.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 5000 - 1: 20000

Not yet tested in other applications.
