

c-Fms(Phospho Tyr809) Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP14521

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from human M-CSF Receptor around the

phosphorylation site of Tyr809. AA range:781-830

Mol wt 107984

Species reactivity Human, Mouse, Rat

Clonality Polyclonal

Recommended application WB, ELISA

Concentration 1 mg/ml

Full name Macrophage colony-stimulating factor 1 receptor

Synonyms Macrophage colony-stimulating factor 1 receptor; CSF1R; FMS; Macrophage colony-stimulating factor 1

receptor; CSF-1 receptor; CSF-1-R; CSF-1R; M-CSF-R; Proto-oncogene c-Fms; CD antigen CD115

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

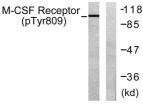

The protein encoded by this gene is the receptor for colony stimulating factor 1, a cytokine which controls the production, differentiation, and function of macrophages. This receptor mediates most if not all of the biological effects of this cytokine. Ligand binding activates the receptor kinase through a process of oligomerization and transphosphorylation. The encoded protein is a tyrosine kinase transmembrane receptor and member of the CSF1/PDGF receptor family of tyrosine-protein kinases. Mutations in this gene have been associated with a predisposition to myeloid malignancy. The first intron of this gene contains a transcriptionally inactive ribosomal protein L7 processed pseudogene oriented in the opposite direction. Alternative splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000 ELISA: 1: 5000

Not yet tested in other applications.

Images

Western blot analysis of 293 using p-c-Fms (Y809) antibody.

Western blot analysis of lysates from 293 cells treated with LPS 100ng/ml 30', using M-CSF Receptor (Phospho-Tyr809) Antibody. The lane on the right is blocked with the phospho peptide.

Storage

-20°C for 1 year
