

Stat6(Phospho Thr645) Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP14556
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human STAT6 around the phosphorylation site of Thr645. AA range:612-661
Mol wt	94135
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, IHC-p, IF, IP, ELISA
Concentration	1 mg/ml
Full name	Signal transducer and activator of transcription 6
Synonyms	Signal transducer and activator of transcription 6; STAT6; Signal transducer and activator of transcription 6; IL-4 Stat

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by this gene is a member of the STAT family of transcription factors. In response to cytokines and growth factors, STAT family members are phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the cell nucleus where they act as transcription activators. This protein plays a central role in exerting IL4 mediated biological responses. It is found to induce the expression of BCL2L1/BCL-X(L), which is responsible for the anti-apoptotic activity of IL4. Knockout studies in mice suggested the roles of this gene in differentiation of T helper 2 (Th2) cells, expression of cell surface markers, and class switch of immunoglobulins. Alternative splicing results in multiple transcript variants.

Recommended Dilution

WB: 1: 500 - 1: 2000

IP: 2 - 5 ug: mg

IHC-p: 1: 100 - 1: 300

ELISA: 1: 10000

Not yet tested in other applications.
