

Synapsin-1(Phospho Ser553) Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP14625
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	Synthesized phospho-peptide around the phosphorylation site of human Synapsin-1 (phospho Ser553)
Mol wt	N/A
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Synapsin-1
Synonyms	Synapsin-1; SYN1; Synapsin-1; Brain protein 4.1; Synapsin I

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene is a member of the synapsin gene family. Synapsins encode neuronal phosphoproteins which associate with the cytoplasmic surface of synaptic vesicles. Family members are characterized by common protein domains, and they are implicated in synaptogenesis and the modulation of neurotransmitter release, suggesting a potential role in several neuropsychiatric diseases. This member of the synapsin family plays a role in regulation of axonogenesis and synaptogenesis. The protein encoded serves as a substrate for several different protein kinases and phosphorylation may function in the regulation of this protein in the nerve terminal. Mutations in this gene may be associated with X-linked disorders with primary neuronal degeneration such as Rett syndrome. Alternatively spliced transcript variants encoding different isoforms have been identified.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 10000

Not yet tested in other applications.

Images

Western blot analysis of 293T using SYN1 p-S553 antibody. Antibody was diluted at 1:500

Western blot analysis of lysates from 293 cells treated with PMA, using p-Serynapsin I (Phospho-Ser553) antibody.

Storage

-20°C for 1 year
