

TAF4B Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP14726

Host Rabbit

Isotype IgG

Size 100ul, 50ul, 20ul

Immunogen Synthesized peptide derived from part region of human protein

Mol wt N/A

Species reactivity Human, Rat, Mouse

Clonality Polyclonal

Recommended application WB, ELISA

Concentration 1 mg/ml

Full name Transcription initiation factor TFIID subunit 4B

Synonyms Transcription initiation factor TFIID subunit 4B ;Transcription initiation factor TFIID 105 kDa

subunit;TAF;II105;TAFII-105;TAFII105

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

TATA binding protein (TBP) and TBP-associated factors (TAFs) participate in the formation of the TFIID protein complex, which is involved in initiation of transcription of genes by RNA polymerase II. This gene encodes a cell type-specific TAF that may be responsible for mediating transcription by a subset of activators in B cells. Three transcript variants encoding two different isoforms have been found for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000 ELISA: 1: 5000 - 1: 20000

Not yet tested in other applications.
