

TXND2 Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP15262
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from part region of human protein
Mol wt	N/A
Species reactivity	Human, Rat, Mouse
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Thioredoxin domain-containing protein 2
Synonyms	Thioredoxin domain-containing protein 2 ;Spermatid-specific thioredoxin-1;Sptrx-1

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Probably plays a regulatory role in sperm development. May participate in regulation of fibrous sheath (FS) assembly by supporting the formation of disulfide bonds during sperm tail morphogenesis. May also be required to rectify incorrect disulfide pairing and generate suitable pairs between the FS constituents. Can reduce disulfide bonds in vitro in the presence of NADP and thioredoxin reductase. Contains 1 thioredoxin domain. subcellular location: In ejaculated spermatozoa, it localizes in the caudal region of the head to the end of the principal piece. tissue specificity: Testis-specific. Only expressed during spermiogenesis, prominently in round and elongating spermatids.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 5000 - 1: 20000

Not yet tested in other applications.
