

ACTA2 Monoclonal Antibody

Description

Product type	Primary Antibody
Code	BT-MCA0134
Host	Mouse
Isotype	IgG
Size	50ul, 100ul
Immunogen	Purified recombinant fragment of human ACTA2 expressed in E. Coli.
Mol wt	N/A
Species reactivity	Human,Monkey
Clonality	Monoclonal
Recommended application	WB, IHC-p, IF, ELISA
Concentration	1 mg/ml
Full name	Actin, aortic smooth muscle
Synonyms	ACTA2; ACTSA; ACTVS; GIG46; Actin; aortic smooth muscle; Alpha-actin-2; Cell growth-inhibiting gene 46 protein

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by this gene belongs to the actin family of proteins, which are highly conserved proteins that play a role in cell motility, structure and integrity. Alpha, beta and gamma actin isoforms have been identified, with alpha actins being a major constituent of the contractile apparatus, while beta and gamma actins are involved in the regulation of cell motility. This actin is an alpha actin that is found in skeletal muscle. Defects in this gene cause aortic aneurysm familial thoracic type 6. Multiple alternatively spliced variants, encoding the same protein, have been identified.

Recommended Dilution

ELISA: 1:10000

IHC: 1:200 - 1:1000

WB: 1:500 - 1:2000

Not yet tested in other applications.

Images

Western Blot analysis using ACTA2 Monoclonal antibody against HeLa (1) and Cos7 (2) cell lysate.

Immunohistochemistry analysis of paraffin-embedded liver tissues (left) and lung cancer tissues (right) with DAB staining using ACTA2 Monoclonal antibody.

Storage

-20°C for one year
